no way it's the blue double deck traincar unit without pantographs

So I found the first ever .zndpreset (in old train yard) and i wanted to recreate it just for fun, so here it is! Huge credits to BassT on discord for posting the original!!!

Specifications:

Train Creator:	IlIan7611 (originally created by BassT on discord)
Vehicle's Country:	Fictional, but most likely Germany since it's based off of a DBpza cab car
Vmax/Max speed:	160
Coupler Type:	Screw link
Coupler Height:	0.65
Number Of Seats:	Same as DBpza cab car
Compatible ZnD-Versions:	v0.10+

Repaints:

- None :D

Additional Information:

I'm pretty sure you can couple as many as you want, haven't tested. You can test though!
