

How to Upload Models

To be able to upload your creation, you first need to [sign up](#). After you created your account, verified your email-address and logged in you can now create pages in the book ZnD-Train-Yard.

Creating a new page:

1. Head to the chapter which corresponds to your model-type
2. Press the button "+ New Page" on the left/right side of your monitor

You should now have created a new page which already contains the template for your vehicles site.

Customising your Page

Replace every text in square brackets with the needed texts/images. And don't forget to remove the note on the top.

You can also completely redesign your pages layout, but please try to include the information which the basic template asks you to give.

How to Upload Images:

1. Click on the image icon in the tool row
2. Click on "Upload Image" in the upper right corner
3. Select your Image in the file-selection window
4. Click on Open
5. Click on the now uploaded Image in the Image Library
6. Click on "Select Image" in the lower right corner

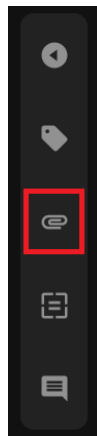

Note: Sadly you cannot place images freely on your page :(

Uploading a preset

1. Go to the Attachments (small paper clip) in the tool column on the right
2. Click on "Upload File"
3. Select your presets or zip-file in the file-selection window
4. Click on "Open"

After finishing up your page, you can now find your presets in the "Attachments"-section on the upper left (just where you can find example.zndpreset on this page).

Deleting a preset:

1. Go to the Attachments (small paper clip) in the tool column on the right
2. Click on the red "x"
3. Click "Confirm" to remove this file permanently from the page
